DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, drawn to a method of mail production including scanning, inspecting and classifying postal items by physical property of said postal items, classified in class 209, subclass 584.
 - II. Claims 9-18, drawn to a computer controlled mail sorting apparatus, classified in class 700, subclass 224.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method of Claims 1-8 do not indicate any automatic or computer control. The method can be performed by hand. Invention II, directed towards Claims 9-18, are directed toward a computer program and computer control and data manipulation, as described in Claims 9 and 11, for example, "determining data" with either a computer or computer control structure.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey A. Shapiro whose telephone number is (703)308-3423. The examiner can normally be reached on Monday-Friday, 9:00 AM-5:00 PM.
